

# Hot Weather is Coming...

## Chill Out with an Ice Machine Rental from TriMark Adams-Burch!

Crescent

### Offering Three Different Ice Shapes

Hoshizaki's **crescent cuber** ice machines are unlike any on the market. The double-sided KMEdge™ evaporator design creates clean, clear, hard ice in half as many ice-making cycles as grid-cell machines.

Hoshizaki's 1.8" diameter specialty **Sphere Ice** is designed for both preparation and presentation, making it perfect for signature cocktails and premium spirits. Its smooth, slow-melting design enhances drinks by keeping them colder longer while minimizing dilution. Ideal for upscale bars, restaurants, and lounges, sphere ice adds a refined touch to any beverage.

Hoshizaki's **2by2 specialty ice cubes** – measuring at 1.9" x 1.9" x 2.3" – make a bold statement with their large, crystal-clear design. Perfect for premium cocktails, whiskey, and spirits, these slow-melting cubes enhance drink presentation while minimizing dilution. This unit is the ideal solution for upscale bars, restaurants, and lounges, who want to add a touch of sophistication to any beverage experience.
